Profile

I am a neurodivergent web and app developer with a strong background in SAP systems and modern web technologies. I am a self-taught learner with a deep passion for logic, aesthetics, and functional systems. My thinking is structured, interconnected, and often unconventional—I find creative solutions where others see limits.

I have many years of experience in SAP development but also work passionately on my own web and app design projects—often using JavaScript, PHP, or the Java SDK. I develop for real clients as well as through personal projects (e.g., mini-games, prototypes, or UI concepts).

Work Experience

Since 2020

Freelance SAP Developer, Langenfeld

• UI5 development, Fiori apps, form design

• Workflow customization, data migrations

• Debugging, system optimization via SE19, CMOD

Since 2019

Freelance IT Service Provider

• Web development with HTML, CSS, JavaScript, PHP

• MySQL integration, CMS customization

• UI prototypes and concept development

Education

Since 2013

Computer Science Studies, Heinrich Heine University Düsseldorf

(Not completed – paused for health reasons)

2012

High School Diploma (Abitur), Lycée Marsa Saada, La Marsa

Skills & Interests

Languages

• Arabic (native)

• French (native)

• German (fluent)

• English (fluent)
